

Measurement the size of the metal frame

Application: measure the size of the metal frame

NEW TRY Products: Telecentric lens: VCM35F-150-AL
Illumination: VCL-150 parallel light source

- C Mount Bi telecentricity;
- <0.1% distortion;
- High resolution with clear image;
- Perfectly measure the size of the metal frame.

Camera: 29MP Vieworks, 35mm, 5.5 μm (Sensor: 36mmx24mm)

- Resolution (H x V) 6576 x 4384px

Test conclusion:

- Ideal for measure the size of the metal frame.
- Accuracy: Depending on different cameras resolution and image areas.
122.9mm*81.9mm <0.0188 mm with 6576 \times 4384 pixels
- Performance: Clear image, nearly 0 distortion.
- Test image: Achieved image with high definition and great uniformity .
