

Measurement the size of the bearing

Application: Measurement the size of the bearing

NEW TRY Products: VCM125-120

Illumination: VCL120-1W-G parallel telecentric lighting

- C Mount telecentricity;
- <0.1% distortion;
- High resolution with clear image;
- Perfectly measure the sizes of the bearing.

Camera: 5MP AVT, 1/2.5" 2.2 μm (Sensor: 5.7mm x 4.28 mm)

- Resolution (H x V) 2592x1944px

Test conclusion:

- Ideal for measure the size of the bearing.
- Accuracy: Depending on different cameras resolution and image areas 95.0mm*71.3mm <0.036 mm with 2592x1944 pixels.
- Performance: Clear image, nearly 0 distortion.
- Test image: Achieved image with high definition and great uniformity.
